

100 SINGERS IN 100 COUNTRIES

INTERNATIONAL
I SEE MYSELF IN YOU

5 million brings us
\$300,000,000

Ask Warner Brothers or MGM if there aren't a thousand different ways to illustrate accounting. The point is we are dealing with great sums of money.

To our advantage, each of our top level super star singers in each of our hundred countries (along with their team members, their record companies, etc.) already has millions of *established* on-going enthusiastic music fans!!

The total of fans scheduled to discover and enjoy the excitement of our new "I SEE MYSELF IN YOU", NEW GLOBAL ANTHEM SONG as recorded and released by our singers in JAPAN is 10 million people. Japan represents a mere trickling of our international new business activities.

Japan is only one country. We are working in 99 additional countries to give us a total of 100 countries. Apply JAPAN's example to all our other 99 countries. When we multiply the 10 million loyal entertainment fans factor, as realistically defined per our Japanese campaign, to all of our 100 countries, we clearly see that our people fan base concerning all of our 100 countries amounts to 1 BILLION PEOPLE !!! Inside one billion music fans who will have come to know our new global anthem song, I SEE MYSELF IN YOU, is *a big revenue flow* for all of us. Join us. As a prospective partner of ours, we feel you will appreciate the following rare and valuable information. Thank you.
